DATA CLEANUP

2018 ODIN Work Day

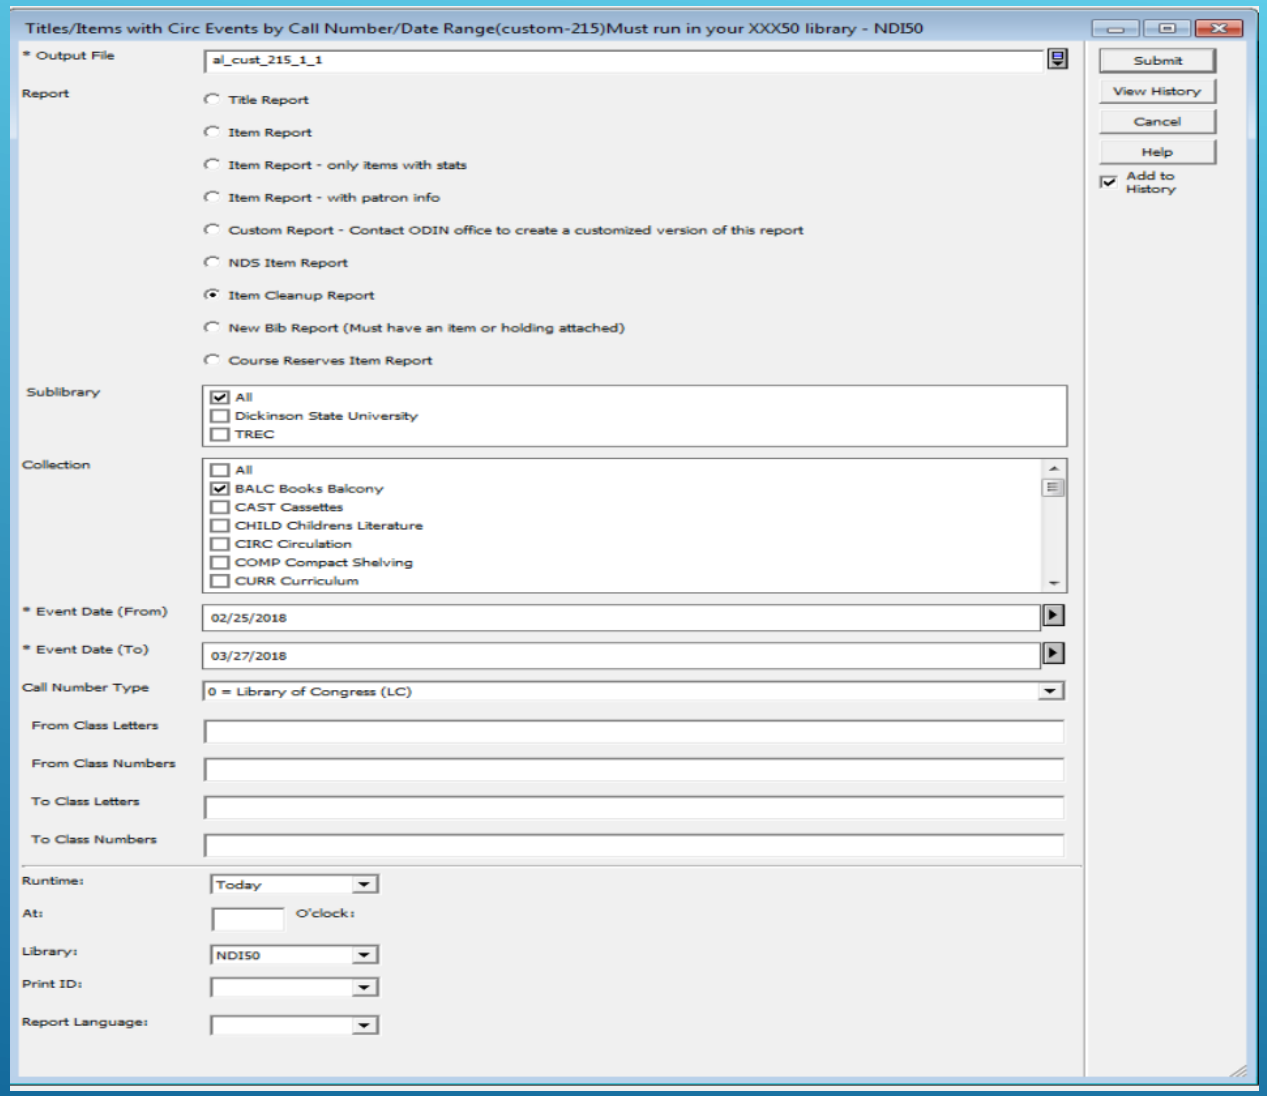
Alan Rykhus

ODIN is looking at moving off of Aleph to a new ILS or LSP in the near future.

When it comes time to migrate, life will be busy with data review, training, and preparing your patrons for the new system.

With that in mind, now is always a good time to look at data cleanup. I'm going to go over a few custom reports that can aid you in finding data that might need a little polishing.

This presentation will deal with reports dealing with items, fines, patrons, loans, and bib records.



CUSTOM-215

In order to find items that might need work use custom-215.

- Select Item Cleanup Report
- Select collections to minimize the report. I'm able to look at approximately 40,000 items
- If you limit to a call number range you will NOT find one of the main issues – wrong call number type
- Date range means nothing to this report
- Use Browse HTML to print. Select All and copy into a spreadsheet

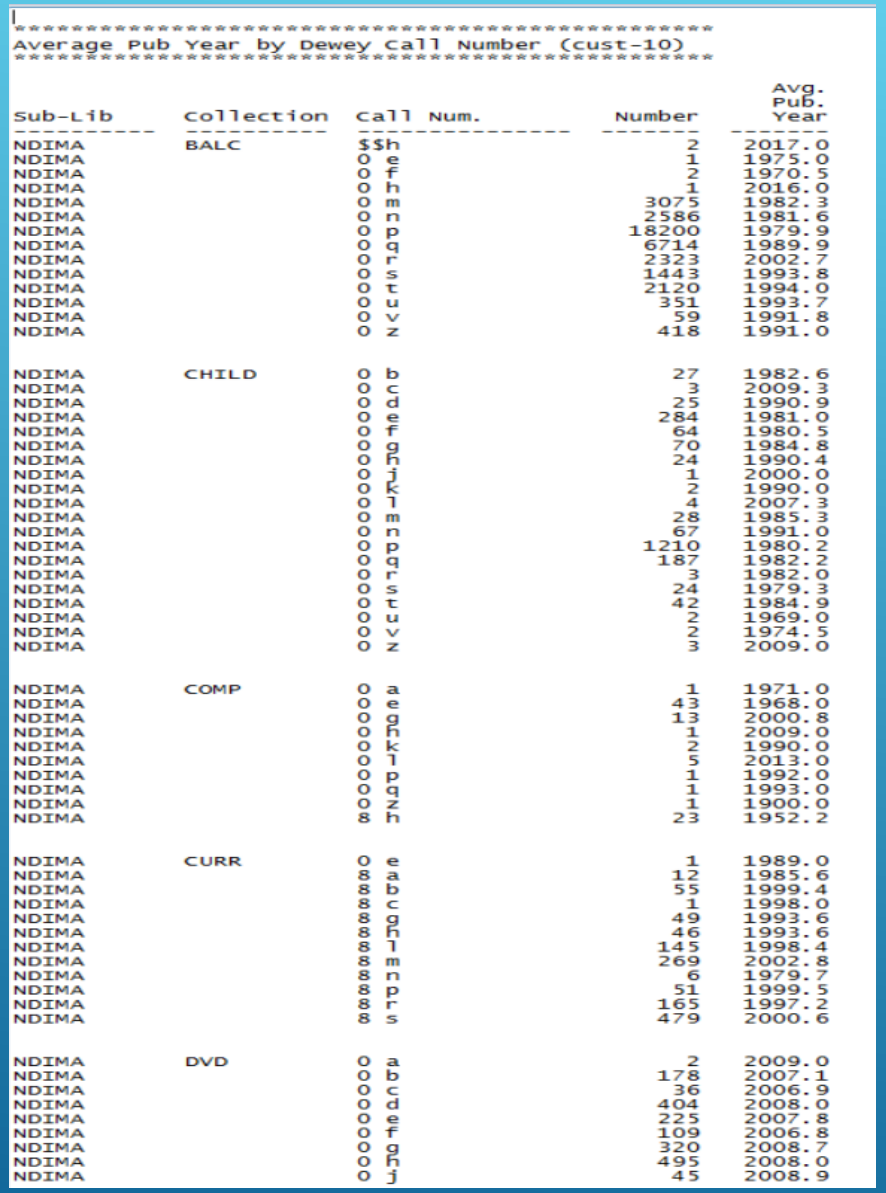
CALL NUMBER TYPE

- As you can see, the first 2 entries here have no call number type. This typically means the holding record is missing the first indicator.
- You can sort on other fields to group things together
- If you sort on Item Status, the first 3 and last 3 items have a different status
- Is this correct? Only you would know that



```

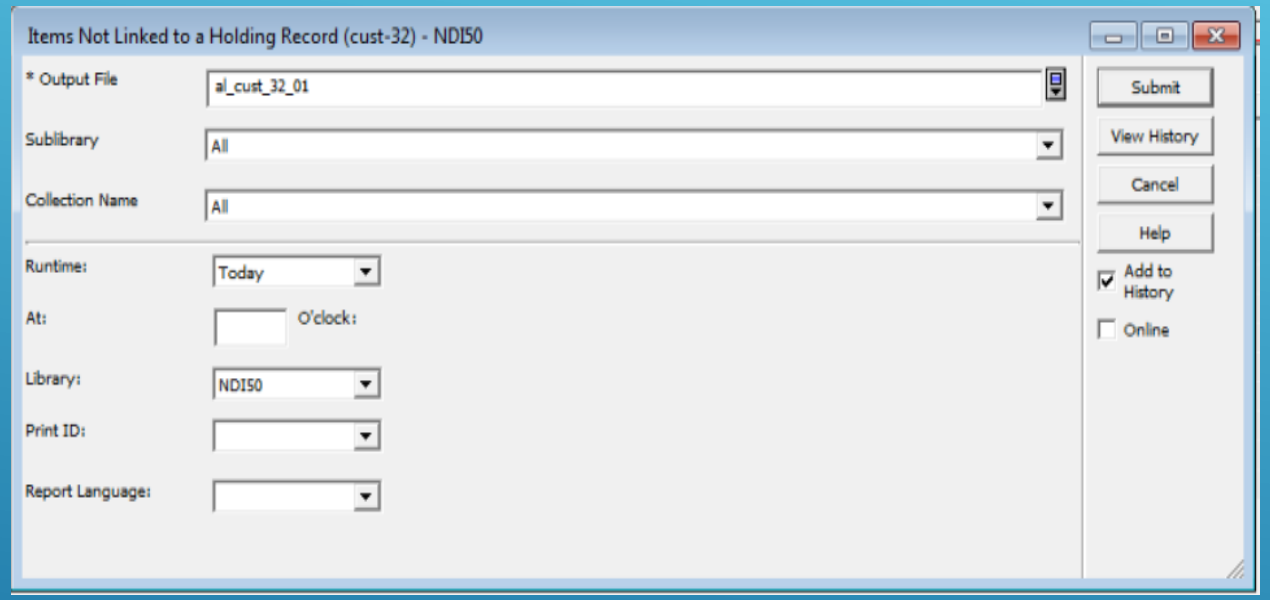
IS THERE AN EASIER WAY TO FIND STRANGE CALL NUMBERS?

Yes! We are going to use custom-10, Average Year by Dewey Call number.

- Select Average Year by Call Number
- Enter an output file name
- The results sort by call number type and first digit of call number
- As you can see the odd ones stick out
- Again, only you know if these results are correct or not.
- This report just lets you know what collections and how many there are.
- You will still have to find the exact items

ITEMS NOT LINKED TO A HOLDING RECORD



p_custom_32 – Items not linked to a holding record

- Items do not have to be linked to a holding record
- If they are, when you update the holding record, the item is updated
- Enter an output file name and select ALL for the other 2 parameters

CUSTOM-32 RESULTS

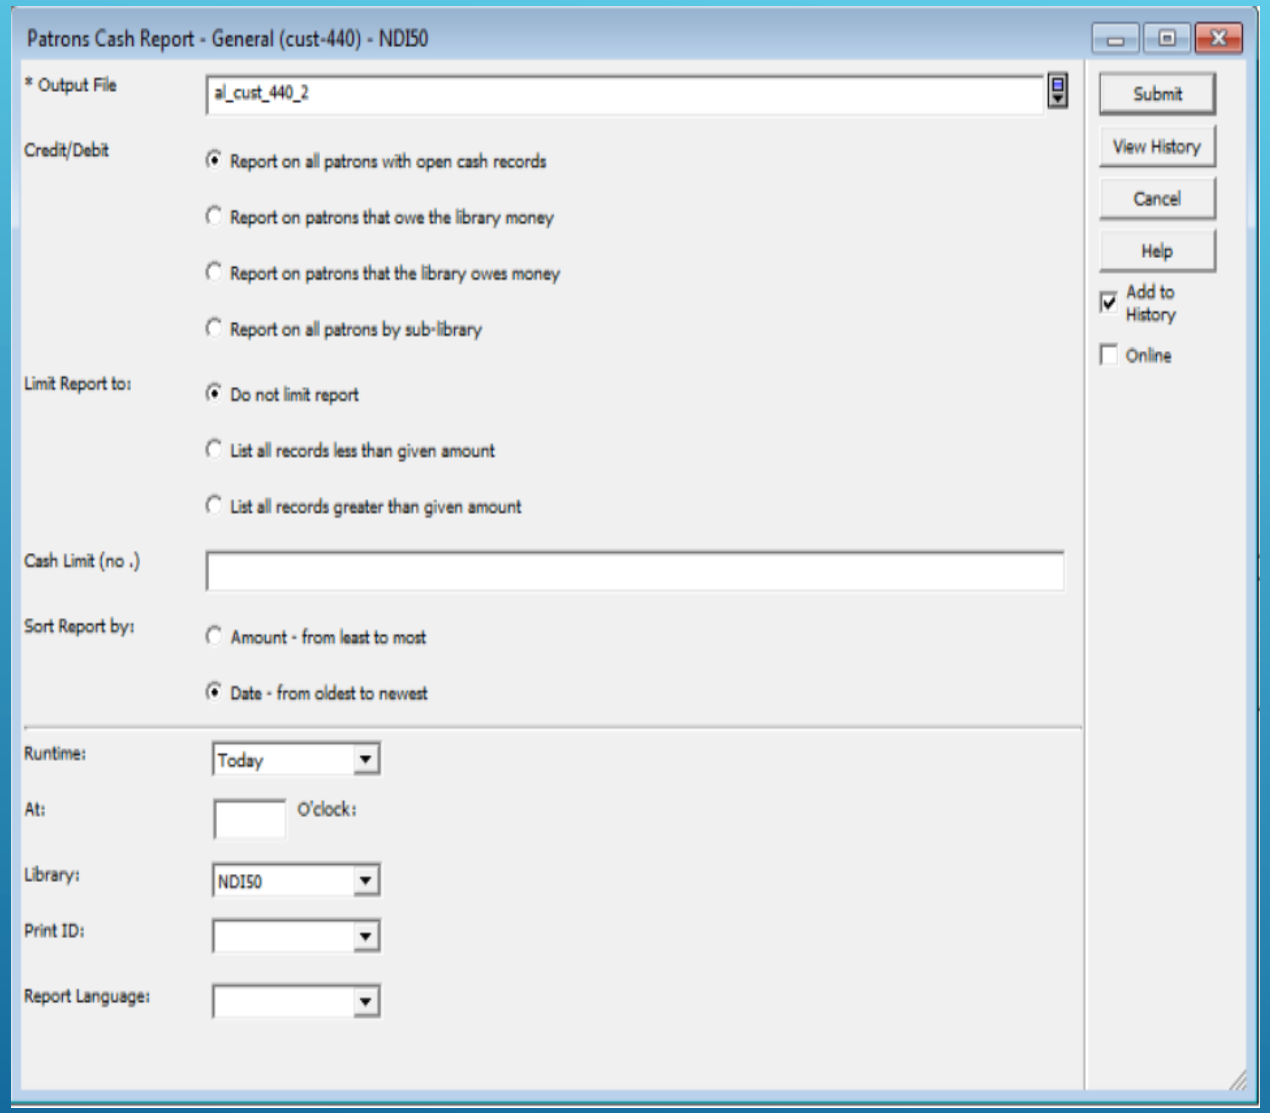
CUSTOM-460 RESULTS

- The most important part of this report is to look at items that went missing a long time ago.
- These items will probably be linked to a patron
- If they are really old it's a good thing to clean them up



FINES
CUSTOM-440

There are a lot of old fines out there. Some of them are from the PALS system. It would be a good time to decide how you want them handled.

- Run p_custom_440
- Report on all patrons with open cash records
- Do not limit report
- Sort from oldest to newest

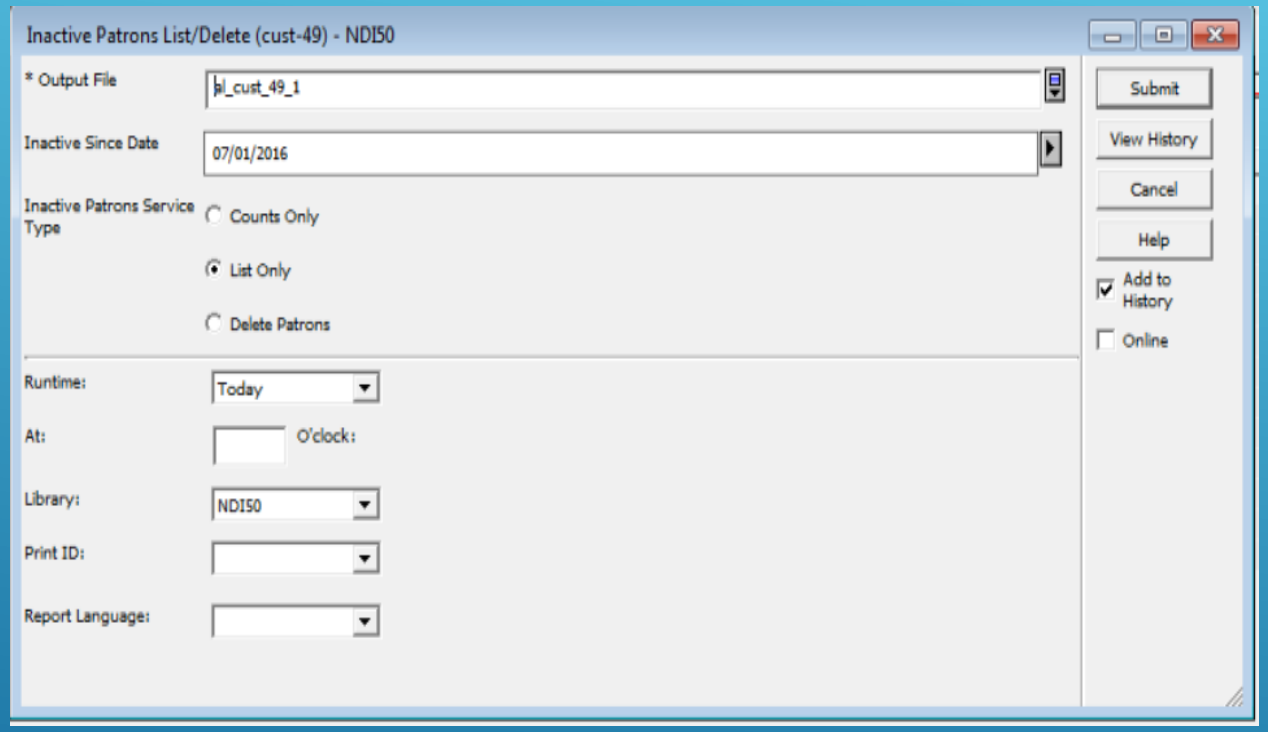
CUSTOM-440 RESULTS

- The report will list current open fines
- The date is the date of the last cash transaction for that patron
- As for migrating fines, it will depend on the system we move to
- If you look at things now it will give you time to decide how you want to handle the old fines

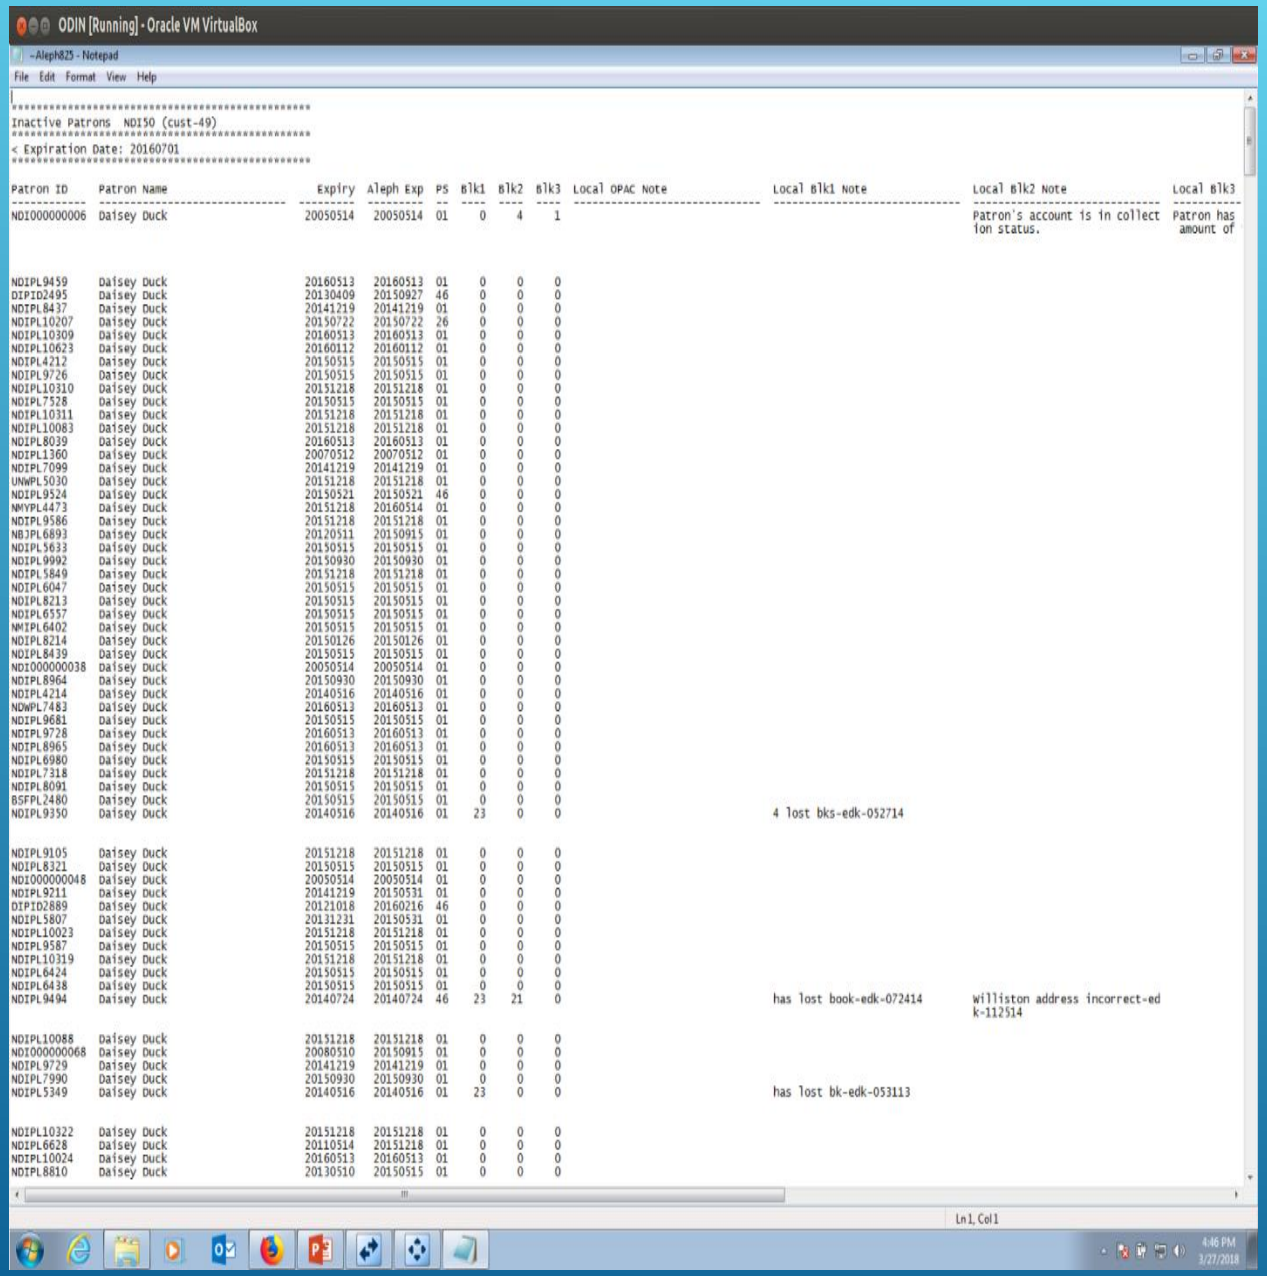


OLD PATRONS

We'll look at 2 reports dealing with patrons.

Even though we run a patron purge project every year, there are a lot of expired patrons that can be cleaned up.

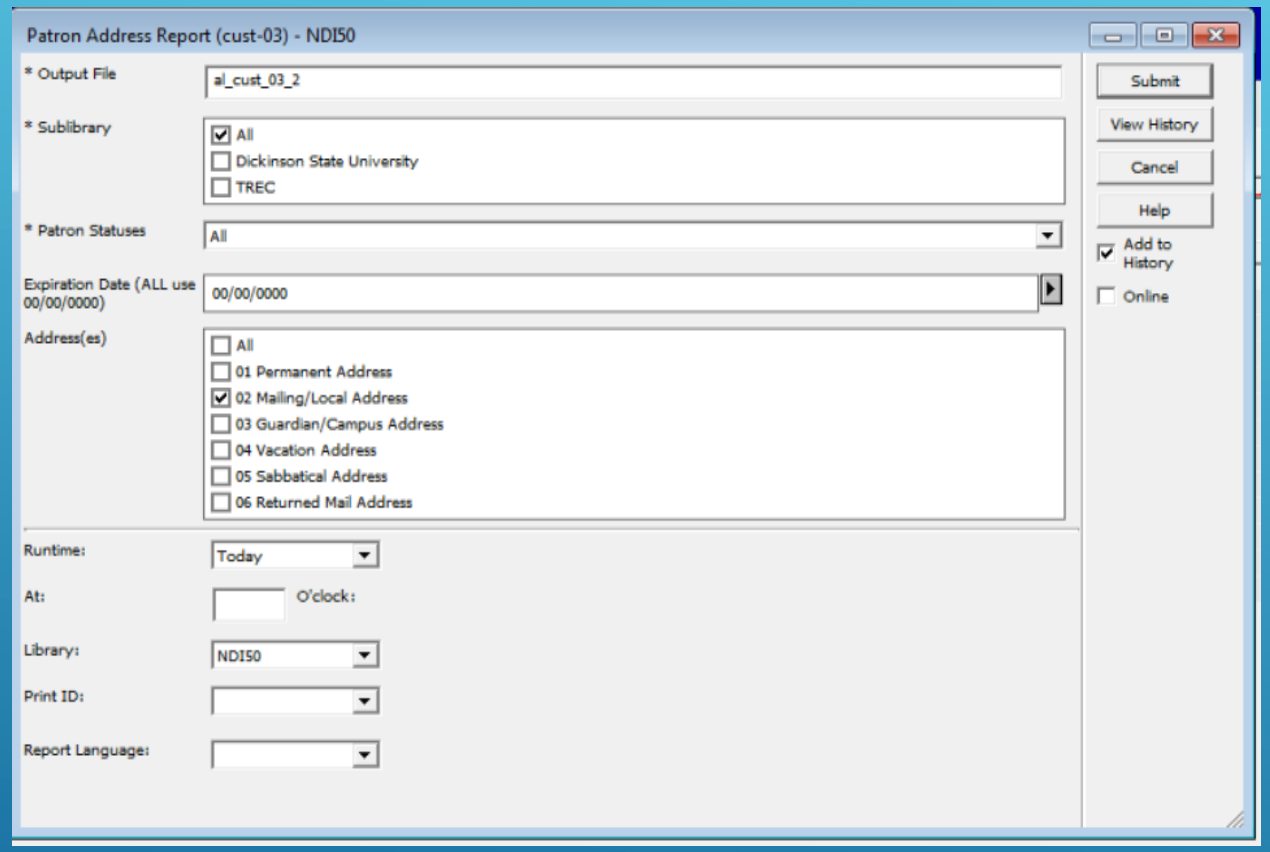
- p_custom_49
- Pick a date – I used July 1, 2016
- Select List Only



CUSTOM-49 RESULTS

- Report lists results alphabetically
- If there are blocks on a patron they are listed
- Lists the local expiration date and the Aleph level expiration date
- If the Aleph expiration date is newer, the patron probably has privileges in another library
- Should this be sorted by expiration date?

OLD PATRONS CUSTOM-03



Another way to find old patrons is to run p_custom_03 – Patron Address Report

- Run for all patrons
- Use 00/00/0000 for the expiration date
- Select an address type – unless you want to see them all

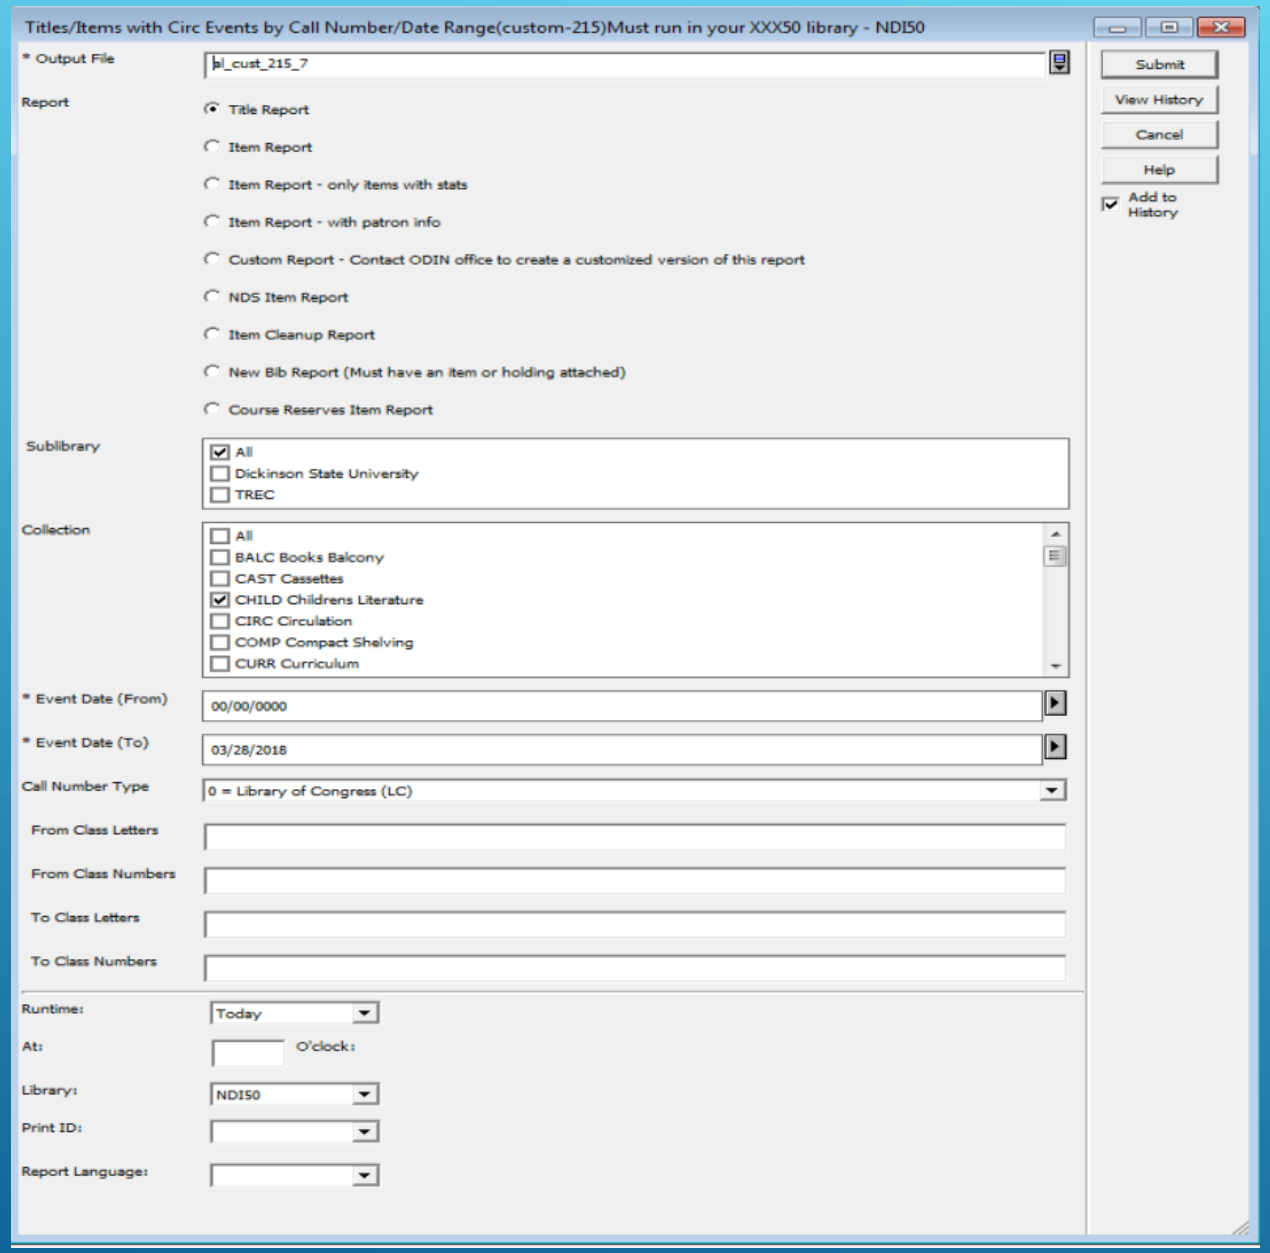
CUSTOM-03 RESULTS

- This report can be easily dumped into Excel
- You can then sort on the expiration date.
- This allows you to start with your very old patrons
- It is up to your library to set the policy on how to handle these old patrons
- There are some very old patrons out there



HISTORIC LOAN DATA

- Historical Loan data is not migrated
- If you want to have this information you will need to run reports and save them
- p_custom_215
- Run the title report (or item)
- Select dates for your reports
- Set limits to the report so it is not to large

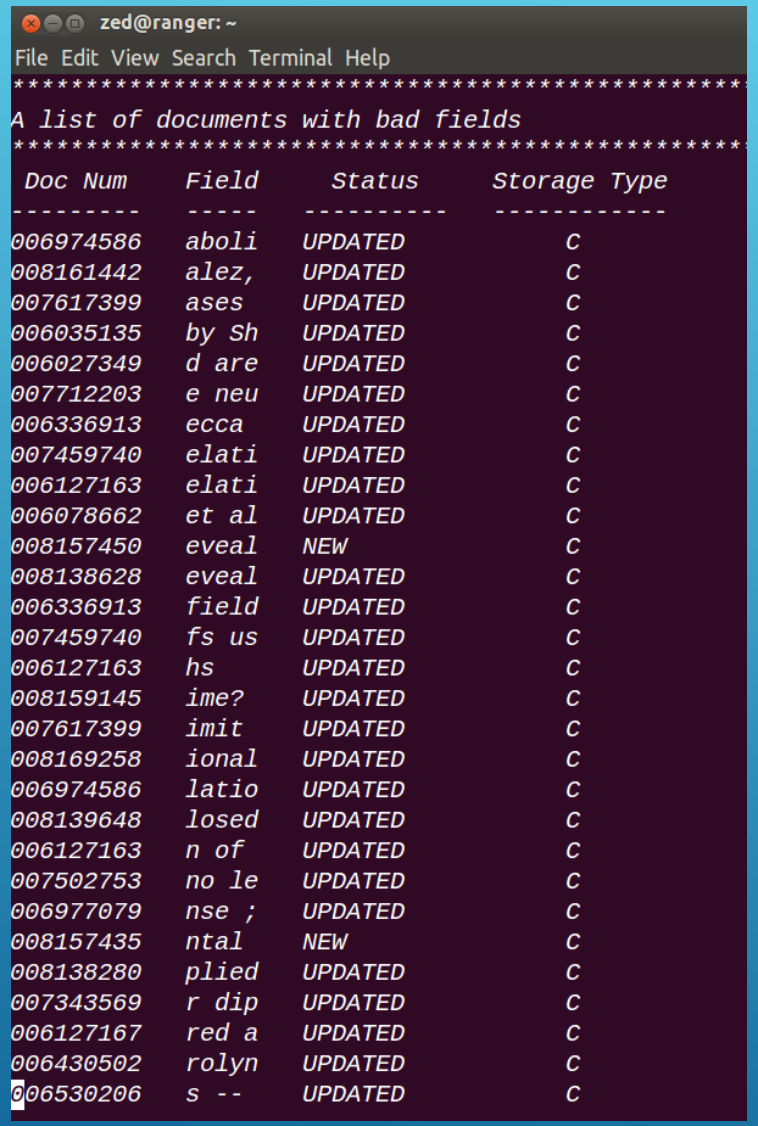
CUSTOM-215 RESULTS

- Report is sorted by call number
- You can sort using the title sort column
- Lists all titles and counts the Z35 Events entries for the titles
- List titles without transactions
- Run a series of these reports and save them if you want this historical data



CORRUPT FIELDS IN BIB RECORDS

- We run a special report that looks for corrupt fields in bib records
- These fields are caused by using ‘Import Records’ and not running the ‘OCLC Conversion’ Convert Procedure on the records in the Catalog client.
- Large note fields do not get split correctly unless you run this procedure. Aleph has a 2000 character limit per field
- The ODIN office either fixes the records for you or sends lists of records needing work to some libraries

THANK YOU
